## How to enable macros in Excel 2003?

To enable macros in Excel 2003, please follow the steps below:

1. On the Tools menu, point to Macro, and then click Security.
2. On the Security Level tab, select Low.
3. Close & Re-open Nirmal XBRL Generator.xls in MS-Excel.

## How to enable macros in Excel 2007?

To enable macros in Excel 2007, please follow the steps below:

You can change macro security settings in the Trust Center, unless a system administrator in your organization has changed the default settings to prevent you from changing the settings.

1. On the **Developer** tab, in the **Code** group, click **Macro Security**.

**TIP** If the **Developer** tab is not displayed, click the **Microsoft Office Button**  (2007), click **Excel Options**, and then in the **Popular** category, under **Top options for working with Excel**, click **Show Developer tab in the Ribbon**.

2. In the **Macro Settings** category, under **Macro Settings**, click the option that you want.

**NOTE** Any changes that you make in the **Macro Settings** category in Excel apply only to Excel and do not affect any other Microsoft Office program.

**TIP** You can also access the Trust Center in the **Excel Options** dialog box. Click the **Microsoft Office Button** , and then click **Excel Options**. In the **Trust Center** category, click **Trust Center Settings**, and then click the **Macro Settings** category.

3. Close & Re-open Nirmal XBRL Generator.xlsm.

## How to enable macros in Excel 2010?

1. Click on the 'File' tab and then on 'Options' tab.
2. In "Outlook Options" window, select the 'Trust Center' tab and then click on the 'Trust Center Settings' tab.
3. Now in the "Trust Center Settings" window, click on the 'Macro Settings' tab and then under the 'Macro Settings' group, select the check box that says "Enable all Macros".
4. Close & Re-open Nirmal XBRL Generator.xlsm.

## How To Change Regional Settings of Date in Windows?

To open the Regional and Language Options tool:

1. Click **Start**, and then click **Control Panel**.
2. Click **Date, Time, Language, and Regional Options**, and then click **Regional and Language Options**.
3. To change one or more of the individual settings, click **Customize**.

**NOTE:** The location selection that you make includes default display options for the way dates, times, and numbers are displayed.

### To Change the Date Display

1. In the **Customize Regional Options** dialog box, click the **Date** tab to specify any changes you want to make to the short date and the long date.
2. **Set SHORT DATE FORMAT to dd-MM-YYYY.**
